Foreword

National Rural Livelihoods Mission (NRLM) is a unique attempt to empower the poor, building their capacities and augment their capitals - **SOCIAL, HUMAN, FINANCIAL, PHYSICAL, ENVIRONMENTAL, POLITICAL** and **CIVIC**. It is probably the only scheme where the people concerned are in the central place and they decide their priorities. Of course, support is provided from outside but only in tune with people's priorities and needs.

This approach to development calls for special attitudes arising out empathy and a mission approach on the part of the staff - radically different from the qualities formally available with development bureaucracy. The NRLM Resource Cell at NIRD&PR has developed the module for building the capacity of staff after a great deal of consultations. I am sure that it will contribute to furthering the objective of National Rural Livelihoods Mission.

Utility Note

Introduction:

The Government of India (GoI) established the National Rural Livelihoods Mission (NRLM) in June 2010 to implement the new strategy of poverty alleviation woven around community based institutions, which is renamed as “Aajeevika”. The programme was formally launched on 3rd June, 2011 at Banswada, Rajasthan and is being implemented in a mission mode across the country.

Core belief:

The core belief of National Rural Livelihoods Mission (NRLM) is that the poor have innate capabilities and a strong desire to come out of poverty. The challenge is to unleash their capabilities to generate meaningful livelihoods and enable them to come out of poverty. NRLM focuses on universal inclusion of the poor, prioritizing the poorest of the poor, identified through participatory processes and converted into institutions of the poor that are supported to leverage formal credit and access services and benefits meant for the poor, as well as develop innovative community led interventions leading to sustainable livelihoods and improved quality of life.

Mission:

The mission of NRLM is “to reduce poverty by enabling the poor households to access gainful self-employment and skilled wage employment opportunities, resulting in appreciable increase in their incomes, on a sustainable basis through building strong grassroots institutions of the poor. These institutions enable and empower the poor households to build-up their human, social, financial and other resources, solidarity, voice and bargaining power. They, in turn, enable them to access their rights, entitlements and opportunities.”

NRLM Values:

The following core values shall guide all the activities under NRLM:

- strong belief in the capacities and skills of the poor;
- providing a meaningful role for the poor in all project processes – planning, implementation and monitoring;
- promotion of transparency and accountability in CBOs; and
- Reducing their dependence on external support agencies.

Guiding Principles:

The following principles inform all the activities of the Mission:

- poor have a strong desire to come out of poverty, and have innate capabilities to realize the same;

- social mobilization and building strong institutions of the poor are critical for unleashing the innate capabilities of the poor; and
- A dedicated and sensitive support mechanism is required to induce the social mobilization, institution building and the empowerment process and facilitating knowledge dissemination, skill building, access to credit, access to marketing and access to other livelihoods services would facilitate the upward mobility of the poor.

About the Hand book on Training Module outlines:

The hand book on Staff Capacity Building training module outlines is prepared with the objective to support SRLMs on various capacity building activities. These outlines are prepared to provide training to staff CCs/BPMs. It basically aims at providing session plans along with the resource material for the same in order to help the trainers who will impart training to Staff, who either lack in content or develop the same or do not have enough material to refer. Besides, it aims at developing the comprehensive understanding among the trainers. It is to be noted that these are suggested module outlines which intend to help the trainers across the SRLMs and also to address their needs of training materials.

Let us first focus on what needs to be done prior to imparting training to Staff. Firstly, it is expected that SRLMs should identify and create a pool of trainers at the state level who will undergo training on these different thematic and they will be called as Trainers of Trainers (ToTs). Secondly, SRLMs need to identify and build a cadre of trainers at district and block level. Thirdly, the trainers at SRLM will impart training to the identified district level trainers who will eventually become the part of trainer's fraternity and this process needs to be followed on a regular basis in order to meet the demand of staff (CCs & BPMs) for a period of initial three years.

Once we have enough number of trainers identified and trained at state level, the focus shall be on building the capacities of the staff. The detailed Abstract of training outlines is being attached in order to develop understanding about the staff Capacity Building training module outlines.

Some Do's and Don'ts for Trainers:

The trainer team is expected to use this hand book as a ready reference base volume for preparing for theme based sessions as per the design-brief and tips for facilitators, included in each session/topic. The trainer team is expected to prepare their own power point presentations, flipcharts or other audio-visual support aids based on the content in each topic. Typically, at least one-third of the time should be devoted to question and answer and experience sharing sessions. This could be towards the end of a session. By and large, the trainer team is free to adopt any other methodology which he/she finds more suitable or else methodology suggested in the module can be followed. The content delineated in each session, although, minor changes/innovations can be made, as per local needs/time-spills.

The trainer team is expected to ensure gender-friendly behavior, seating arrangement and proactive encouragement to mainstream participation of the staff. Also, the trainer team is expected to exercise tactful handling of dominators - not allowing them to monopolize discussions and drawing in the shy and inhibited to participate with more ease and confidence.

Before every session, the trainer team is expected to keep all handouts to be distributed ready, along with all training media and material required for effective conduct of the session. During the session, the trainer team is expected to demonstrate good inter-team communication skills, by way of working in smooth coordination i.e. if one member is the key facilitator for a session, then other team members are facilitating the discussion and recording of emerging views. At no stage, they are to engage in conflict or contradictions of each other's views. After every session, the trainer/trainer team is expected to review the effectiveness of the session through quick on the spot feedback of the participants, both verbal and non-verbal, elicit views of the trainer team members on what worked well, what could be improved and what went wrong, which requires rectification in future. Typically at least one-third of the time should be devoted to question & answer and experience sharing sessions.

The “mantra” for trainers for effective training is to know and prepare well for the subject/training to be delivered, facilitate learning through interactive processes, build confidence of participants through effective inter-personal communication and analyze the strengths and weaknesses of every session/training conducted for continuous striving for excellence.

Induction and Capacity building Module outlines for the staff (BPMs/CCs)

About the Training Modules:

Induction, immersion and training are the key components of the staff capacity building framework under NRLM. Block Project Managers /Cluster Coordinators are the frontline army of NRLM. They are the face of NRLM for the community and hence, their thematic and implementation understanding on the NRLM Program holds huge significance for the mission. The capacity building of BPMs/CCs is a continuous process with a mix of fieldwork and classroom segments. The programme aims to orient them to NRLM philosophy and processes. The focus of the induction is on introducing basic concepts (poverty, vulnerability, livelihoods, gender, institution building, interventions, etc.) and skills (management, planning, training and leadership) to help them contribute meaningfully to NRLM implementation. After the three months induction the BPMs/CCs will be trained on other 20-25 thematic areas within the span of the 3years. The idea behind providing this intensive continuous Capacity building is to make the BPMs/CCs strong enough to manage the institutions of the poor after the project withdrawal.

The training modules are prepared with the objective to support SRLMs on various capacity building activities for the staff. The trainings will lay emphasis on different concepts and themes of NRLM. The training modules basically aim at providing session plan along with the resource material for the same in order to help the trainers to bring in a sense of uniformity across SRLMs. It is to be noted that these are suggested modules which intends to help the trainers across the SRLMs and also to address their needs of training materials.

For the effective and smooth implementation of capacity building activities, the SRLMs should develop a training calendar at State, District and Block level respectively. The training methodology in the programme shall be essentially participatory and interactive, combining various methods like – Interactive Lecture Method (ILM), Small, Focused and Large group discussions, brainstorming, experience sharing, group work, role plays, flip charts, exercises, case studies, training films, pre-and post-training questionnaires, diagramming, mapping and most importantly field immersion to resource SHGs, VOs and Resource Blocks (RBs) followed by action plans.
