21 (page 24)	Paper cost for : A4 size 100 sheets	Rate per ream of paper (25X36 size)	The original specification only is retained. By using ream and sizes, it creates confusion in arriving at paper cost. The printers as they purchase material in reams only, they prefer this. But, for clarity, if we take rate for 100 papers then it will be easy to arrive at paper cost - by counting the number of papers for the order multiplied by rate per 100 papers.
	System designing of title pages are not mentioned in the particulars.	The designing aspect of title pages and inner pages is already covered in Item No.1 and 2.	The designing aspect of title pages and inner pages is already covered in Item No.1 and 2.
	The term 'Maplitho' is mentioned as 'Maplitha' and A4 as A/4 at certain places	This may be read as 'Maplitho' and 'A4' where ever required	It is a typographical error which has been corrected.
	Some small printers who want to participate only for small items like envelopes, brochures etc are seeking relaxation in the annual turn over.	The annual turn over amount will be relaxed in deserving cases. But the turn over amount must be mentioned.
